From the Editor

After 10 years of absence, the Faculty of Mechanical Engineering at Koszalin University of Technology is currently planning to resume its journal so far titled (*Zeszyty Naukowe Wydziału Mechanicznego Politechniki Koszalińskiej in Polish*) New version of journal will be drafted/published in English under new title: *Journal of Mechanical and Energy Engineering*.

The series will cover two technical disciplines, i.e. mechanical engineering and modern power engineering. In the field of mechanical engineering the journal covers a broad range of issues connected with mechanical design, materials processing technology, surface engineering, metrology, tribology, modeling and simulation of mechanical systems, automation, robotics, rapid technologies, maintenance and management of mechanical systems and other related problems. In terms of power and energy engineering scope of the journal covers issues related to fluids engineering, heat transfer, refrigeration and air-conditioning, energetics and renewable energy resources as well as solar energy and other similar topics.

Our initiative is based on previous editorial experience concerning publishing of *Scientific Journal of Faculty of Mechanical Engineering at Koszalin University of Technology*, that goes back to 1975, i.e. when Koszalin University of Technology was Higher Engineering School yet. First edition of journal by the

Faculty was published in 1975 and was titled *Manufacturing Techniques*. („*Techniki Wytwarzania*”). Since 1980 our editor-in-chief was Jan Wojtkun. During the years our journal was published in two series *A - Construction* and *B – Technology*. In 1986 Wojciech Tarnowski took over the position of editor-in-chief while new layout was introduced and the title changed to *Polioptimization*. Since 1990 the journal was published as *Scientific Journal of Faculty of Mechanical Engineering*. Among the scietific editors we should mentione Jerzy Milanowski, Bronisław Słowiński, Wojciech Kacalak, Ewa Wachowicz and Leon Kukielka. The editors of the last journal (published in 2007) were Wojciech Tarnowski and Tomasz Kiczkowiak. The idea of „*Journal of Mechanical and Energy Engineering*” is therefore the continuation of previous publications by the Faculty of Mechanical Engineering at Koszalin University of Technology.

We believe, the collaboration with authors willing to publish their papers, will ensure a high scientific level of the journal. However, reliable and substantial evaluation of paper proposals received by the editorial office is mandatory. Accordingly, it is crucial to provide proper verification by recognized scientists. Therefore, I address to you, Sir or Madame, a proposal of collaboration as a reviewer of our journal. We look forward to a successful co-operation.

Waldemar Kuczyński
Editor-in-Chief

CONTENTS

Preface	3
 Mechanical Engineering	
Seweryn KIERAŚ, Krzysztof NADOLNY, Overview of the centrifugal methods of provision the grinding fluid to the grinding zone	7
Krzysztof NADOLNY, Wojciech KAPŁONEK, Nicolae UNGUREANU, Effect of macro-geometry of the grinding wheel active surface on traverse internal cylindrical grinding process	15
Krzysztof ROKOSZ, Tadeusz HRYNIEWICZ, Steinar RAAEN, Winfried MALORNY, Fabrication and characterisation of porous coatings obtained by plasma electrolytic oxidation	23
Wojciech STACHURSKI, Influence of supplying the vegetable oil with minimal quantity lubrication on wear of the hob during hobbing process of the gears	31
Paweł SUTOWSKI, The effect of process parameters on grinding forces and acoustic emission in machining tool steel 1.2201/NC10	37
Michał WOJTEWICZ, Original methods of ceramic grinding wheels impregnation	45
Ryszard WÓJCIK, Wojciech STACHURSKI, Application of PIV method to study the speed distribution of oil mist particles in the orthogonal cutting process	51
 Energy Engineering	
Tadeusz BOHDAL, Bubble boiling in flow of refrigerating media	57
Tadeusz BOHDAL, Marcin KRUZEL, Małgorzata SIKORA, Analysis of heat transfer coefficient during refrigerant condensation in vertical pipe minichannel	65
Stanisław DUER, Laszlo POKORADI, Dariusz BERNATOWICZ, Radosław DUER, Classification of elements in the diagnostic model of a technical object for building an expert knowledge base	71
Rafał LASKOWSKI, Maciej JAWORSKI, Maximum entropy generation rate in a heat exchanger at constant inlet parameters	79
Jacek PAŚ, Operation of the electronic transport systems on within vast railway area	87
Adam ROSIŃSKI, The operational-reliability assessment of a power supply for the alarm system of a transport facility	95
Małgorzata SIKORA, Flow structures during refrigerants condensation	101
Zbigniew ZAPĄLOWICZ, Influence of irradiance and ambient temperature on roof coating temperature and heat flux transferred to interior of building	107
