

## CONTENTS

### Mechanical Engineering

- Dilan Ezgi DÜZGÜN, Krzysztof NADOLNY, Continuous liquid interface production (CLIP) method for rapid prototyping . . . . . 5
- Ikuobase EMOVON, Improving risk analysis capability of FMEA using evaluation based on distance from average solution (EDAS): a case study of turbocharger system . . . . . 13
- Wojciech KAPŁONEK, Miorița UNGUREANU, SEM-based imaging and analysis of surface morphology of the Trizact™ advanced structured abrasives . . . . . 17
- Jarosław PLICHTA, Krzysztof NADOLNY, Emilia GIERSZEWSKA, Construction and technical modification of grinding wheels for internal cylindrical grinding using SCAMPER method of creative innovation design . . . . . 27
- Marcin ROMANOWSKI, Krzysztof NADOLNY, Methods of graphical analysis of production processes . . . . . 33

### Energy Engineering

- Md. Arman AREFIN, Avijit MALLIK, Hybridization of battery and ultracapacitor for low weight electric vehicle . 43
- Waldemar KUCZYNSKI, Aleksander DENIS, Electromobility as one of the ways to a low emission transport system . . . . . 51
- Piotr PIATKOWSKI, Wojciech PUSZKIEWICZ, Electric vehicles: problems or solutions . . . . . 59
- Adam RUZIEWICZ, Alexander KRUSE, Zbigniew GNUTEK, Thermodynamic analysis of a thermoacoustic travelling wave engine . . . . . 67
- Konrad ZAJKOWSKI, Reactive power compensation in a three-phase power supply system in an electric vehicle charging station . . . . . 75
